Classifying a Conic Section Worksheets. How to Classify a Conic Section - Just as how the area between two radii of the circle enclosed by the circumference of a circle on the upper end is classified as a sector if we consider the three-dimensional version of a circle, which is a sphere, almost similar sector will be known as a cone or a conical section.

Bing: Conic Sections Test Answer Key

The conic sections were first identified by Menaechus in about 350 BC, but he used three different types of cone, taking the same section in each, to produce the three conic sections, ellipse, parabola and hyperbola. It was Apollonius of Perga, (c. 255-170 BC) who gave us the conic sections using just one cone. Key Point
