Best Sensation And Perception Questions and Answers (Q&A)

Steven's power law. A law of magnitude estimation that is more accurate than Fechner's law and covers a wider variety of stimuli. It is represented by the formula $S=kl^a$, where S =sensation, K =a constant, l =stimulus intensity, and a =a power exponent that depends on the sense being measured. This is significant because if you have already used Fechner's law but want a more accurate answer, then there is Steven's power law that can give you that as well.

Chapter 4 Sensation and Perception Flashcards | Quizlet

Sensation and perception are two separate processes that are very closely related. Sensation is input about the physical world obtained by our sensory receptors, and perception is the process by which the brain selects, organizes, and interprets these sensations.
